

AMENDMENTS TO THE ABSTRACT

Please amend the Abstract as follows:

A method and system for effect addition in video edition is disclosed. Firstly, one or more video clips are selected and arranged. The selected video clips are scanned by scene scanning to generate effect ~~marking in~~ Mark-In points. Then effects can be added on the effect ~~marking in~~ Mark-In points according to a default effect type and its default duration. This will be convenient for user to proceed the video edition afterward.
